

# Liberate Your Communications

Unleash employee productivity with a customizable secure collaboration and communication solution. Clearspan's PING Desktop and Mobile applications seamlessly integrate with our powerful Unified Communication platform, purpose-built for organizations operating at scale. Get end-to-end encrypted instant messaging, audio/video conferencing with file sharing, SMS and MMS, plus phone, voicemail, and advanced feature control direct from your desktop or mobile device.

## PING Collaboration

Collaborate with internal and external participants via crystal clear video and audio, multi-participant screen sharing, and a full suite of modern collaboration features.

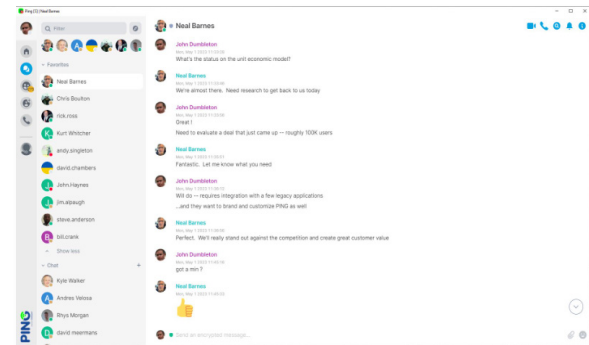

However your business chooses to communicate, Clearspan PING has you covered!

## PING Chat & SMS

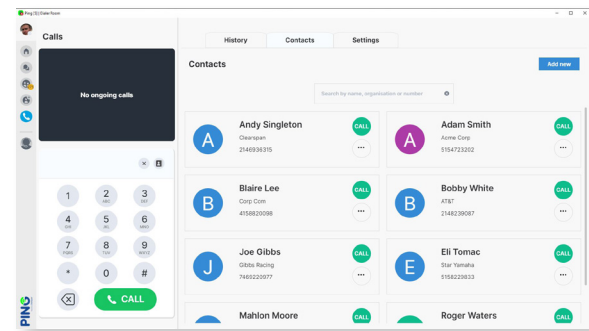

Securely communicate with colleagues via chat, video, and voice. Drive productivity with dual screen sharing, drag and drop file sharing, and easy chat search features.

Seamlessly interact with external parties via inbound and outbound SMS and MMS. Easily create SMS contacts, groups, and response automation all from the PING client.

## PING Phone

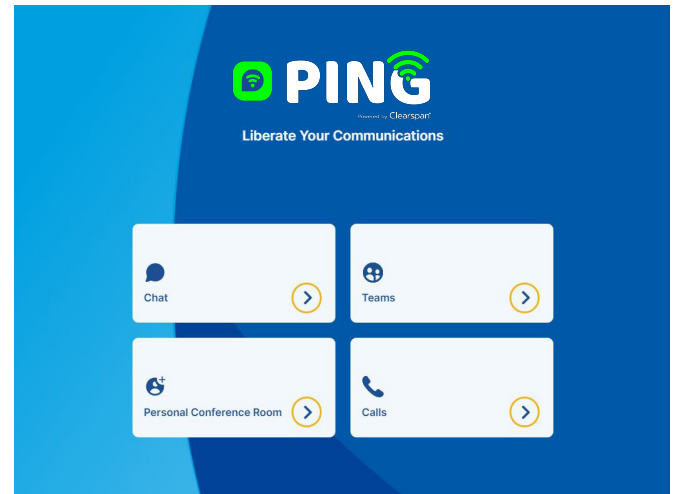

Never miss an important call with a built-in phone application. Dial and receive calls from your business phone number directly from the app, check your voicemail, forward calls or easily transfer to other extensions.

## PING Customization

Easily customize PING to include other mission critical applications your business uses with integrations to Microsoft Outlook contacts and calendar.

Represent your business with a custom branded Home Page with your company's logo, color, scheme and UX requirements.

### Collaborate & Customize

Leverage extensive built-in collaboration tools or customize the user experience to your business needs.

### Fully Brandable

Create your own, fully branded PING application to connect and represent your brand to your customers and users.

### Private & Secure

Dedicated environments with end-to-end session encryption give you complete control and data sovereignty.

Learn how to customize PING for your business to improve communication, security and the user experience by contacting Clearspan today at 1-877-314-5682.
